DETAILED ACTION

Applicant's amendment submitted 12/02/2008 is acknowledged. Applicant amendment filed on 12/02/2008, amended claims 1, 28, and added new claims 33-43.

Currently claims 1, 3-11, 13, 16-17, 26-30, 32-43 are pending.

However, in view of the instant newly added claims, the instant claims 1, 3-11, 13, 16-17, 26-30, 32-43 read on a numerous patentably distinct species, the species election requirement as follows:

This application contains claims directed to a genus encompassing numerous species of oils in the composition.

The claims are drawn to composition comprising a broad range of polar oils. The search for all species of oils useful in the composition herein presents an undue burden on the office due to their wide-ranging variations in structure and their correspondingly separate and distinct fields of search. For example, a composition comprising oil, octyldecanol would be classified in 514/724, a composition comprising capric acid triglyceride as oil would be classified in 560/1, etc.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 3-11, 13, 16-17, 26-30, 32, 39-43 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is

allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call to the applicant's agent to request an oral election was not made, due to the complexity of the restriction.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shobha Kantamneni whose telephone number is 571-272-2930. The examiner can normally be reached Monday-Friday on 8am-5pm.
